

Corporate Digital Signage

Digital Signage can provide high impact corporate messaging, way finding, facilities scheduling, real time travel information (bus, rail, and traffic) targeted advertising and is an invaluable mechanism for communicating with staff and visitor alike.

Corporate clients are deploying Digital Signage solution as this enables them to communicate essential business news items to staff, visitors and customers.

Staff can be made aware about sales promotions or call statistics throughout their working day to improve productivity and knowledge.

Visitors and customers can be entertained from the moment they enter your building with digital news and promotions that are relevant to your business.

Reception areas, staff rooms, canteens, satellite offices or even car parks are ideal places to use digital screens to deliver way finding information, public transport news, emergency alerts, corporate identity and of course sales and marketing materials.

The benefits of digital signage over traditional static signs are that the content can be exchanged more easily, animations and videos can be shown, and the signs can adapt to the context and audience, even interactively. Digital signage offers superior return on investment compared to traditional printed signs and can significantly reduce your publishing outlay.

Our Full 1080p High Definition digital signage solutions allow you to create and deliver targeted messages that inform, educate and motivate your audiences.

Using ZingHD Digital Signage you can fully customise and control all your digital displays from almost anywhere, with ZingHD you can change, update, schedule and refine any content from your desktop or from across the internet for the most targeted messaging possible.
